

- Webpage consists of 3 parts: Map, Bar chart and Bootstrap

Map

- The map is of Europe and coloured from yellow to dark red. These colours resemble the Crime Index. As red is a colour associated with violence, blood and danger. I thought it a gradient from orange to red would be fitting to use it for this visualisation.

Bootstrap

- I used a bootstrap modal to show the story, I think it is important that people can focus about the story without being distracted by the map and bar chart, which is why I chose modal, it shades out the rest of the webpage.

Bar chart

- The bar chart shows the amount of intentional homicides per 100.000 inhabitants of a country. As homicides are often bloody, I found it fitting to use dark red and red as the colours.
- The x-axis does not have a title because I think it is quite self-explanatory
- The font is sans-serif and comfortable to read
